

# Progress on registration tools

J.H Kim<sup>1</sup>

<sup>1</sup>High Energy Physics Team  
KISTI, Daejeon, Korea

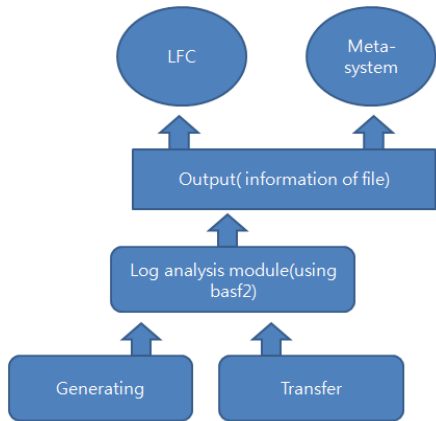

DH meeting, 2011.06.09

## Overview

- 1 Registration system
- 2 Summary and Next step

## 1 Workflow of registration tool

- We want to make the automatic registration tools.
- The files will be from transfer and generating except for raw data.
- The information of raw data will use the HLT log file in the offline storage(from Itoh san's diagram).
- We will make the log analysis module based on the framework.
- After generating or transfer, We will add the log analysis module to get the information.
- We will return the output for LFC and Meta-system.
- We will register the information into Meta-system and connect with gBasf2.

Workflow of registration

## Next Step and Summary

- We will develop the log analysis module with basf2.
